

# *Outside Time*

Spirit is represented as a circle, as it has no beginning or end, symbolising eternity.

On the other hand, matter is represented as a square, with a clear start and end.

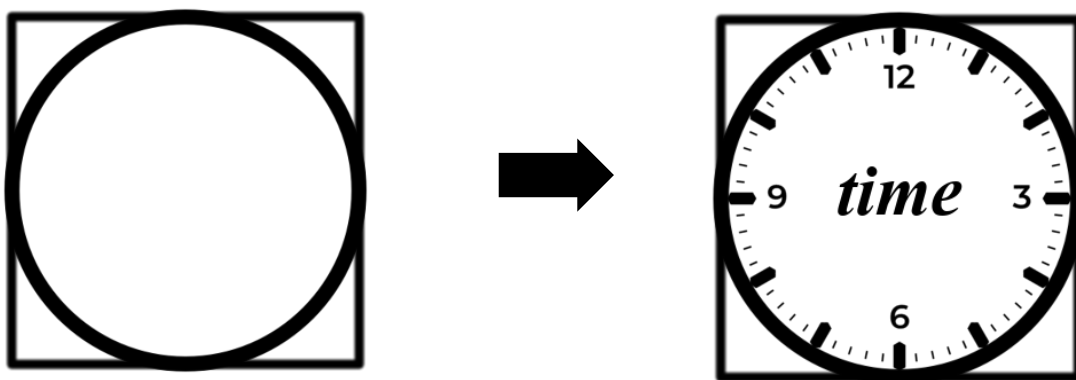

Spirit over matter is the truth, but matter over spirit is time.

**SPIRIT**

In our modern age, we are programmed from birth to believe that physical matter is the sole plane of existence and that nothing exists beyond it. However, this belief is fundamentally incorrect. Before anything can manifest in the physical world, it must first exist in the spiritual realm. This is why spirit is ALWAYS beyond matter.

However, if we align with the government's and education's agenda by asserting that matter is indeed beyond spirit, we'd get something like this:

The idea that physicality resides over matter is **TIME**.

Time is a construct created by the mind; time is a **LIE**.
